(551) 260-0220

IT professional with 6 years of experience in software development and extensive expertise in designing large system architecture and facilitating improved engineering solutions.

Currently pursuing a Master's Degree in Computer Science from **Stevens Institute of Technology**.

Snapshot of my recent work includes:

- Full stack development of financial modules like Payment Gateways, Fund Transfer, Loans.
- Batch job optimization using multithreading and automation.
- Designed a preferential service framework for retail bank customers.
- BDD, TDD, defect resolution and production support.

At **Oracle Financial Services Software(OFSS)**, I contributed to the following tasks:

- Understood user requirements & translated them to programmable problem statements.
- Led a team of 5 to upgrade product version from 9.5 to 10.2
- Contributed in meetings with Product Owners globally.
- Faced challenges like scope creep, change of requirements, external dependency, implementation of new technology, resource and time crunch.
- Divided tasks into iterations to be delegated to sub teams and individuals.
- Acted as a full stack developer implementing UI, DB queries and business logic.
- Collaborated with different team representatives when needed
- Developed POCs to bolster my idea with numbers and facts.
- Presented ideas, findings and results of Proof of concepts in meetings.
- Patched defects and made changes post and pre release to meet satisfaction and ever changing demands of Ops and Product owners.

At **IBM**, I contributed to the following tasks:

- Performed root-level implementation of business requirements.
- Brainstormed and reached consensus on implementation of those requirements.
- Tested features before commits and provided support during release.
- Automated application configuration setup.
- Enhanced overall functionality of several modules.

I have worked in diverse sections of the software development cycle. My ability to work alone and in teams is clearly demonstrated by the projects and organizations that I have worked with in the past. Although I have some experience as a developer, I think it is my insatiable curiosity and drive to learn and grow that makes me a perfect fit for this role. Thank you for your time and consideration.

Sincerely,

Ishan
